ABOUT ME

I am a hardworking and motivated Computer Science graduate with a passion for technology, programming, and web development. I enjoy learning new skills, solving problems, and working on digital projects that help improve my creativity and technical abilities. I am adaptable, willing to learn, and capable of working both independently and as part of a team.

EXPERIENCE

• Supervising Administrative Officer Assistant

I served as an On-the-Job Trainee (OJT) assistant to the Supervising Administrative Officer at the Provincial General Services Office (PGSO), where I assisted with administrative tasks, document organization, data encoding, and daily office operations while gaining professional workplace experience.

• Freelancer

I worked as a freelance developer, assisting clients with websites and digital projects while applying my skills in HTML, CSS, JavaScript, and basic programming. This experience helped me improve my problem-solving, communication, time management, and client collaboration skills while working independently and meeting project deadlines.

• Video Editor

I worked as a freelance video editor, creating and editing videos for social media, promotional content, events, and personal projects. This experience helped me improve my creativity, attention to detail, time management, and storytelling skills while working independently and meeting project deadlines.

• Warang Ta – Educational Game | Capstone Project Lead Programmer & Team Leader

Led the development of Warang Ta, an educational game designed to promote the history, culture, and tourism of Kalibo, Aklan. Developed interactive gameplay features that introduce players to local tourist attractions and teach basic Aklanon language and cultural knowledge. As Lead Programmer and Team Leader, I was responsible for implementing core game systems, coordinating the development team, and helping guide the project from concept to completion.
